Credit Representative Dataset – Help File

Getting Started

1. Purpose

This document is to provide guidance for the Credit Representative Dataset files uploaded to data.gov.au by ASIC every Thursday.

2. Credit Representative Dataset

The Credit Representative Register file on data.gov.au is a dataset from ASIC's Credit Representative Register. This dataset is a point in time snapshot of Credit Representative data.

The Credit Representative dataset contains publicly available information for current appointments of credit representatives to credit licensees. See the data dictionary for fields available in the dataset.

2.1. File Format

The Credit Representative Dataset is provided in a file with the extension of csv (comma separated values), xlsx and tsv.

Note: The Credit Representative Dataset csv is **not** separated by commas.

The Credit Representative Dataset csv uses the 'TAB' character as the delimiter (value separator) between values in the dataset; the 'TAB' character is used in place of a comma separator because names can contain commas and therefore are not a suitable delimiter for this dataset. The csv file uses double quote encapsulation around all String datatype variables that contain either a comma (,) or double quote (").

Credit Representative Dataset – Help File

An example of the data in the Credit Representative Dataset csv is as follows

REGISTER_NAME	CRED_REP_NUM	CRED_LIC_NUM	CRED_REP_NAME
CRED_REP_ABN_ACN	CRED_REP_START_DT	CRED_REP_END_DT	CRED_REP_LOCALITY
CRED_REP_STATE	CRED_REP_PCODE	CRED_REP_EDRS	CRED_REP_AUTHORISATIONS
CRED_REP_CROSS_ENDORSE			
Credit Representative	123456 111111	EXAMPLE PTY LTD	2222222222 2011-04-01
WEMBLEY	WA 6014 AFCA	Different to Registrant	

2.2. File interaction

The Credit Representative Register dataset contains over 30,000 records.

It is recommended users interact with the dataset on data.gov.au using one of the following methods:

Important note: XLSX file extensions is no longer supported by CKAN as of December 2021 and any information extracted using an API method may not return up to date data. For more information, see the [CKAN website](#).

- Dataset Preview on data.gov.au
- Download the dataset from data.gov.au
- Access resource data via a web API with powerful query support (Web API information can be found in the [main CKAN Data API and DataStore documentation](#)).

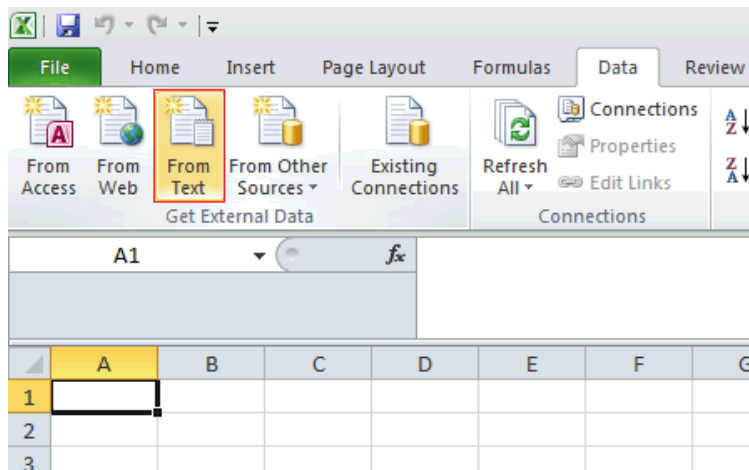

Credit Representative Dataset – Help File

2.3. File Import into Excel

To import the file to Excel use the following steps:

1. Open Excel with a new blank workbook.
2. Import data by selecting the 'Data' menu and 'From Text' as the external data source.

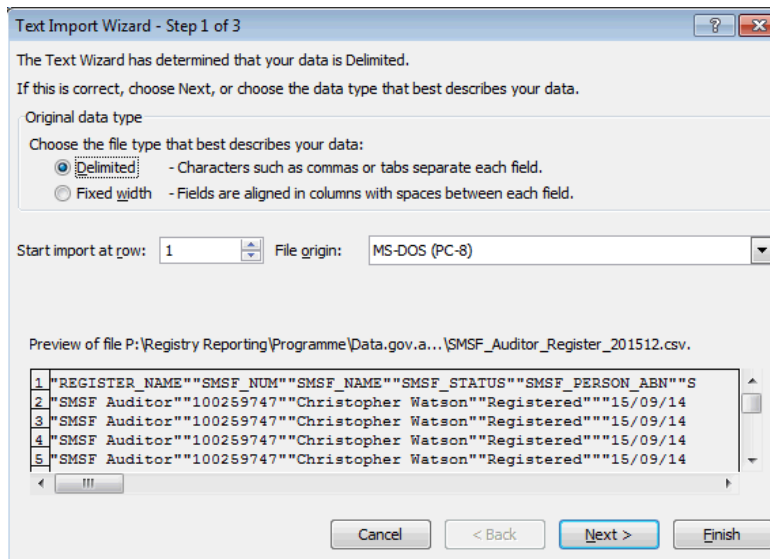

3. Choose your file as the data source and select 'Import'.

Credit Representative Dataset – Help File

4. Import Wizard:
 - a. Select 'Delimited' as the Original data type then select Next.

The Text Wizard has determined that your data is Delimited.
If this is correct, choose Next, or choose the data type that best describes your data.

Original data type

Choose the file type that best describes your data:

☒ Delimited - Characters such as commas or tabs separate each field.

☐ Fixed width - Fields are aligned in columns with spaces between each field.

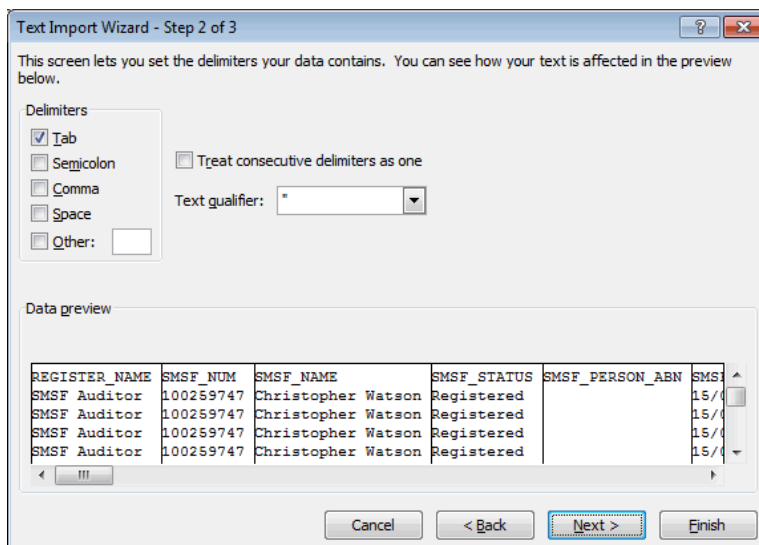

Start import at row: 1 File origin: MS-DOS (PC-8)

Preview of file P:\Registry Reporting\Programme\Data.gov.a...\SMSF_Auditor_Register_201512.csv.

1	REGISTER_NAME	SMSF_NUM	SMSF_NAME	SMSF_STATUS	SMSF_PERSON_ABN	S
2	SMSF Auditor	100259747	Christopher Watson	Registered	15/09/14	
3	SMSF Auditor	100259747	Christopher Watson	Registered	15/09/14	
4	SMSF Auditor	100259747	Christopher Watson	Registered	15/09/14	
5	SMSF Auditor	100259747	Christopher Watson	Registered	15/09/14	

Buttons: Cancel, < Back, Next >, Finish

- b. Select 'Tab' as the Delimiter by checking the box and clear the other check boxes. Then select double quotes " as the Text qualifier, and select Next.

This screen lets you set the delimiters your data contains. You can see how your text is affected in the preview below.

Delimiters

☒ Tab

☐ Semicolon

☐ Comma

☐ Space

☐ Other:

☐ Treat consecutive delimiters as one

Text qualifier: " " ' ' >

Credit Representative Dataset – Help File

3. Data Dictionary

The Credit Representative Dataset contains the following fields:

Field	Description	Data Type	Max Length	Data Parameters
REGISTER_NAME	The name of the register the record belongs to.	Text	255	String identifying the register name
CRED_REP_NUM	A unique identifying number allocated to the credit representative.	Numeric	9	Format: 9 digit numerical including leading zeros (e.g. 012345678)
CRED_LIC_NUM	The licence number that the representative has been appointed by.	Numeric	9	Format: 9 digit numerical including leading zeros (e.g. 012345678)
CRED_REP_NAME	The register entry name of the credit representative.	Text	255	As appears on ASIC's register Logic: IF record relates to a person THEN Show as 'Last name, First name' ELSE Full organisation name
CRED_REP_ABN_ACN	The credit representative's Australian Business Number (ABN) or Australian Company Number (ACN).	Numeric	11	The ABN or ACN for the credit representative Logic: IF credit representative has provided an ABN THEN show ABN ELSE IF credit representative has provided an ACN THEN show ACN ELSE show null
CRED_REP_START_DT	The start date of the credit representative.	Date/Time	10	Date format: DD/MM/YYYY

Credit Representative Dataset – Help File

Field	Description	Data Type	Max Length	Data Parameters
CRED_REP_END_DT	The end date of the credit representative.	Date/Time	10	Date format: DD/MM/YYYY Note: As the dataset is limited to current appointments this field will show null for all entries.
CRED_REP_LOCALITY	The town of the current principal business address of the credit representative.	Text	255	Locality from current principal business address of the credit representative. Data shown is the active business address provided by the credit representative as the principal place of business (Town/City). Note: Localities that are shown as null represent records with a foreign address where the locality could not be validated. Work is currently underway to improve the record set to be consistent.
CRED_REP_STATE	The state of the principal business address of the credit representative.	Text	3	State from current principal business address of the Credit Representative. Note: States that are shown as null represent records with a foreign address where the state could not be validated. Work is currently underway to improve the record set to be consistent.

Credit Representative Dataset – Help File

Field	Description	Data Type	Max Length	Data Parameters
CRED_REP_PCODE	The postcode of the principal business address of the credit representative.	Numeric	4	Postcode from current principal business address of the credit representative. Note: Postcodes that are zero represent records with a foreign address where the post code could not be validated. Work is currently underway to improve the record set to be consistent.
CRED_REP_EDRS	Authorised credit representative holders are required to be a member of an ASIC-approved external dispute resolution scheme.	Text	10	Values for this field are limited to the following: FOS – Financial Ombudsman Service COSL – Credit Ombudsman Service Limited (COSL , now known as CIO - below) FOS:COSL - Multiple Memberships CIO – Credit and Investments Ombudsman
CRED_REP_AUTHORISATIONS	On appointment the credit representative will be assigned either all or a subset of the licence authorisations by the licensee or authorised representative making the appointment. This will be listed as one of four categories	Text	255	Values for this field are limited to the following: Different to Appointing Rep Different to Registrant Same as Appointing Rep Same as Registrant

ASIC
Australian Securities &
Investments Commission

Credit Representative Dataset – Help File

Field	Description	Data Type	Max Length	Data Parameters
CRED_REP_CROSS_ENDORSE	Where an individual or organisation is a representative for more than one credit licensee, there is a requirement to obtain endorsement (approval) from all licensees to which the representative has been previously appointed.	Text	255	For persons or organisations that have been appointed to more than two licences, typically the newer appointments will show incrementally more licence numbers than the one previous. Logic: IF Appointment to second or later licences THEN show current licence numbers for representative that have endorsed cross appointment ELSE show null Note: Delimited by tilde '~' for each value.
